

LIFO Categories, December 2011

Thank you for your interest in the Motor Vehicle Technical Advisor Alternative LIFO for Auto Dealerships New Items Category lists. I've attached the New Item Categories for the quarter ending December 2011.

Due to some organizational and management changes, it is unclear at this time whether we will be able to continue with the new items list in its current format. As the situation develops, I will let you know what the future holds. I do appreciate your interest in this list.

Rev. Proc. 97-36 provides an Alternative LIFO Method for automobile dealers. Section 4.02(5) defines a new item category and Section 4.02(6) provides that the automobile dealer must use the current-year base vehicle cost of the new item category as the prior-year base vehicle cost of that item category.

The revenue procedure requires that dealers obtain invoices for each vehicle in ending inventory, group the invoices into item categories and compute an average base cost for each category. Because the Motor Vehicle Technical Advisor program does not have access to all vehicle invoices, the new items list provided by the program uses the best available public information. Dealers, however, must use actual invoices in their computation. This list is similar to the guidance I provide to examiners who audit automobile dealers' tax returns.

The list is not an "Official List," it does not reflect "Service Position," and examiners are not required to follow it.

If you have any questions, you may contact me at Terri.S.Harris@irs.gov. Thank you
